

Mikhail A.

Front-end engineer

4.5+

Work Experience

SUMMARY OF QUALIFICATIONS

I'm a 30 years old front-end engineer with about 5 years experience in commercial development focused on React, React Native, NodeJS, new experience, experiments & research. I successfully developed and released 5 projects and worked on the maintenance of 10+ projects. I'm passionate about efficiency, good at developing modern, qualitative, testable interfaces, and rapid at problem-solving. I am familiar with Agile, calm, friendly, positive, empathetic team member, and incredibly energetic and motivated.

HARD SKILLS

• React	3.5	Advanced
• React Native	1.5	Competent
• JavaScript	4.5	Advanced
• Typescript	1	Competent
• NextJs	1.5	Advanced
• React-story-book	1.5	Advanced
• React-testing-library	1	Competent
• React MUI	0.5	Advanced
• Redux-thunk	1.5	Competent
• Redux-offline	1.5	Competent
• NodeJs	1	Limited Experience
• MySQL	0.5	Limited Experience
• Docker	4.5	Limited Experience
• HTML5	4	Advanced
• CSS3	4.5	Advanced

• SCSS	4	Advanced
• Less	0.5	Competent
• TailwindCSS	0.5	Competent
• Formik	0.5	Competent
• Yup	0.5	Competent
• Axios	1.5	Competent
• Fetch	4	Competent
• Apollo GraphQL	1.5	Competent
• WebSockets	1	Competent
• Vite	0.5	Competent
• WebPack	2	Competent
• Bitbucket	2.5	Advanced
• Gitlab	2.5	Competent
• GitHub	4.5	Advanced
• Jenkins	1	Limited Experience
• Bamboo CI	1.5	Limited Experience
• Figma	4.5	Competent
• Jira	4.5	Competent
• Apple Connect	0.5	Limited Experience
• Google Play Console	0.5	Limited Experience
• Stripe	0.5	Limited Experience
• Vue2	0.5	Limited Experience

SOFT SKILLS

• Recruitment	0.5	Competent
• Mentoring, coaching	1	Advanced
• Conflict solving	1	Advanced
• Project estimation	1	Competent
• Research	1.5	Advanced

PROJECTS

• BETGAMES - RISK MANAGERS APP

Project description:

The platform for Risk Managers for watching the betting process in real-time. It consists of several pages with information about tournaments and matches, numerous filters, and betting controls such as suspension betting and payout, cancel betting, coefficients changing.

Involvement duration: January 2023 - May 2023

Responsibilities:

- Project start, configuration, development and release
- Participating in code reviews
- Collaborating with QAs, designers, back-end/front-end developers, team-lead, and project manager
- Research
- Knowledge sharing

Project team size: 7

Project role: Front-end developer

Tools & Technologies:

Hard Skills: React, Typescript, React-testing-library, React

MUI, NodeJs, Docker, HTML5, Formik, WebSockets, Vite, Jenkins, Jira

Soft Skills: Project estimation, Research

• **BETGAMES - STREAMING APP & INTRODUCTORY WEBSITE**

Project description:

Streaming app & Introductory website

1) Streaming app - Company films pair games and streams video to React app. The application provides video and the possibility of betting. The partners of Betgames embed the app into their platform as Iframe.

2) Introductory website - Website for advertisement

Involvement duration: July 2022 - December 2022

Responsibilities:

- Project maintenance
- New features implementation
- Participating in code reviews
- Collaborating with QAs, designers, back-end/front-end developers, and team-leads

Project team size: 8

Project role: Front-end developer

Tools & Technologies:

Hard Skills: React, Typescript, NextJs, React-story-book, React-testing-library,

NodeJs, MySQL, Docker, HTML5, CSS3, SCSS, Fetch, WebSockets, WebPack, Bitb

ucket, Jenkins, Figma, Jira

• **BIMSEARCH**

Project description:

The project is an informative wrapper for the 3D viewer. It provides information in different ways by selecting parts of the 3D model using filters, tables, summaries, and calculations.

Involvement duration: January 2022 - May 2022

Responsibilities:

- Application redesign
- New features implementation
- Collaborating with designer, back-end developer, and project manager

Project team size: 4

Project role: Front-end developer

Tools & Technologies:

Hard Skills: React,HTML5,CSS3,SCSS,Figma,Jira

Soft Skills: Mentoring, coaching,Project estimation,Research

• **ACIMS**

Project description:

A mobile application for reporting the work done by Aston Group technicians. The application includes daily and weekly work schedules with appropriate forms to be filled out by plumbers, electricians, gasmen, and others. The application is offline-first and can be used from hard-to-reach places without the internet. A complex form configuration parser was written for the form configs. The application was created for both iOS and Android users.

Involvement duration: January 2021 - March 2022

Responsibilities:

- Project start, configuration, development, and release
- Participating in code reviews
- Estimations
- Investigations and research
- Collaborating with QAs, designers, back-end/front-end developers, and project manager
- Testing

Project team size: 7

Project role: Front-end developer

Tools & Technologies:

Hard Skills: React Native,JavaScript,Redux-thunk,Redux-offline,Axios,Gitlab,Figma,Jira,Google Play Console

Soft Skills: Recruitment,Mentoring, coaching,Project estimation,Research

• **GROWIC**

Project description:

Learning platform for gaining knowledge and developing skills. The idea of the platform is

that the student can create his own course and buy only the required modules.

Involvement duration: January 2020 - June 2021

Responsibilities:

- App start, configuration, development, and release
- Participating in code reviews
- Estimations
- Investigations and research
- Collaborating with QAs, designers, back-end/front-end developers, and project manager
- Testing

Project team size: 6

Project role: Front-end developer

Tools & Technologies:

Hard Skills: NextJs,React-story-book,Docker,HTML5,CSS3,SCSS,Apollo

GraphQL,Gitlab,Figma,Jira,Stripe

Soft Skills: Project estimation

• **EDTIMBER**

Project description:

The marketplace for sawmills, importers, forwarders, and partners to collaborate together efficiently while providing them with a secure one-stop shop for all their timber needs. The platform includes a supply and demand list, negotiation mechanism, shipping, document sharing, etc.

Involvement duration: March 2020 - September 2020

Responsibilities:

- Estimation
- App start, development, and release
- Participating in code reviews
- Investigations and research
- Collaborating with designer, back-end developer, and project manager
- Testing

Project team size: 5

Project role: Front-end developer

Tools & Technologies:

Hard Skills: JavaScript,Docker,HTML5,CSS3,SCSS,TailwindCSS,Fetch,WebPa

ck,Gitlab,Figma,Jira

• **FLO WEBSITE**

Project description:

- 1) Flo Website - informational portal about female health. The website is an addition to the application and contains ovulation, pregnancy, and period calculators, numerous pages, and application advertisements. The portal is developed on top of CMS.
- 2) Flo Help Center - Zendesk-based help platform for the Flo mobile application.
- 3) Numerous landing pages for advertisement purposes.

Involvement duration: June 2019 - December 2019

Responsibilities:

- Project maintenance
- New features implementation
- Participating in code reviews
- Collaborating with designer, back-end developer, and project manager
- Testing
- Zendesk help center start, development, and release
- Optimizations
- Tasks investigation and estimation

Project team size: 7

Project role: Front-end developer

Tools & Technologies:

Hard Skills: JavaScript, Docker, HTML5, CSS3, Less, Bitbucket, Bamboo CI, Figma, Jira

• **DHGE**

Project description:

Informational website for Dignity Health Global Education. It was developed on top of CMS. The website contains information about educational programs and the possibility to apply for a program. It was developed on top of CMS.

Involvement duration: January 2019 - June 2019

Responsibilities:

- Project maintenance
- New features implementation
- Collaborating with designer, back-end developer, and project manager
- Testing
- Tasks investigation and estimation

Project team size: 6

Project role: Front-end developer

Tools & Technologies:

Hard Skills: JavaScript, Docker, HTML5, CSS3, SCSS, Bitbucket, Bamboo

• LSBF

Project description:

Informational website for the London School of Business and Finance. The website contains information about educational programs and the possibility to apply for a program. It was developed on top of CMS.

Involvement duration: January 2019 - June 2019

Responsibilities:

- Project maintenance
- New features implementation
- Collaborating with designer, back-end developer, and project manager
- Testing
- Tasks investigation and estimation

Project team size: 6

Project role: Front-end developer

Tools & Technologies:

Hard Skills:

JavaScript,Docker,HTML5,CSS3,SCSS,WebPack,Bitbucket,Bamboo

CI,Figma,Jira

• SKYTOP

Project description:

Informational website for the facade engineering company. It contains information about the company and its services, portfolio, and contacts.

Involvement duration: November 2018 - December 2018

Responsibilities:

- Project configuration, development, and release
- Project maintenance
- Collaborating with customer
- Testing

Project team size: 1

Project role: Front-end developer

Tools & Technologies:

Hard Skills: JavaScript,HTML5,CSS3,SCSS,GitHub,Figma,Vue2

Soft Skills: Conflict solving
